### **TeamPrepared™ Named Top Safety Product for Schools**

**Lancaster** – InnerLink, an innovative developer of web-based health and safety solutions, has been honored with District Administration magazine’s 2007-2008 Reader’s Choice award for its leading safety product for schools.

TeamPrepared is the bridge between schools and those who serve them in a crisis. This secure web-based solution improves schools’ security and preparedness based on guidelines provided by emergency planning experts with the U. S. Department of Education, Secret Service, FBI and Jane’s Information Group. TeamPrepared features comprehensive site assessments, planning tools to help schools coordinate emergency preparation and plans with first responders, and best-practice templates for planning both natural and manmade incident responses.

“We are excited that the readers of District Administration named TeamPrepared as one of their top 100 products,” said Robert Gillio, M.D., Chairman and CEO of InnerLink, Inc. “It’s a small world when school shootings and other crises seem to come closer to home than one would like. Nothing will prevent tragedy, but good planning can ease and facilitate the recovery, that’s where InnerLink comes in - helping our community stay safe and healthy is our passion.”

Hundreds of District Administration readers rated more than 1,000 products to select the top winners, including InnerLink’s TeamPrepared.
